May 18th, 2020 - in fables and futures estreich goes beyond the personal to describe the ways that genetic technologies affect society and the stories the promoters of such technologies tell about them these fables affect not only how we view new technologies but also how we view normality and the rights and welfare of humans whom we have labeled as having various disabilities" review of fables and futures biotechnology disability

May 16th, 2020 - fables and futures provides an account of what we re thinking and what we re saying about biotechnology and the book demonstrates the

influence of rhetorics around disability that have set the mould for how we conceive and misconceive of new technologies in the vein of writers like Carl Elliott in bioethics and Rosemarie Garland Thomson in disability studies. Estreich makes his case for the importance of rhetoric about biotechnology and disability through the use of many sources'
