'fuzzy logic stanford encyclopedia of philosophy

June 5th, 2020 - fuzzy logic is intended to model logical reasoning with vague or imprecise statements like petr is young rich tall hungry etc it refers to a family of many valued logics see entry on many valued logic and thus stipulates that the truth value which in this case amounts to a degree of truth of a logically pound proposition like carles is tall and chris is rich is "*fitting triangular norms to empirical data dro*

*June 2nd, 2020 - this chapter discusses some specific tools that can be used to build triangular norms based on a finite number of possibly noisy observations such problem arises in applications when observed data e g decision patterns of experts need to be modelled with a special class of functions such as triangular norms we show how this problem can be transformed into a constrained regression"***interval based uncertain reasoning using fuzzy and rough sets**
